Test Driven Development  
Responsive Design  
Agile / Scrum

### ADDITIONAL SKILLS

Adobe Photoshop  
HTML Email  
Sketch

### EXPERIENCE

#### BrewsCruise | Full Stack Web Developer | September 2017

Conceptualized, designed, and developed a SEAN stack app. PostgreSQL database of hot springs locations across Colorado. Locations rendered on a map. When a map marker is clicked, an info window expands to display the nearest craft breweries - sourced from Google Places API. Users can save specific hot springs locations to their favorites list, as well as add locations to the database. Signup and Login/Logout through Firebase authentication.

#### TriSynergy Consulting LLC | Freelancer | September 2017

Redesigned client's existing website to be fully responsive for improved experience on all platforms. Included Google Analytics and SEO.

#### Dine & Grub | Full Stack Web Developer | August 2017

Collaborated as a member of a developer team to build a SEAN stack app. Wrote API calls to Google Places API so that when the user lands on a specified page, the closest twenty restaurants and their details are made available to be rendered in the application.

#### There Again | Full Stack Web Developer | August 2017

Developed a full stack app built around the Yelp Fusion API. Users can search for businesses by name and city, and add them to their list of saved businesses, flagging them as either "There Again" or "NOT There Again". Includes create, read, and delete capability as well as signup and login/logout through passport authentication.

#### Cabela's | Social Compliance Auditor | February 2015 - April 2016

Coordinated a cross-functional international team to ensure social compliance requirements were included in the responsible global sourcing strategy. Collected, analyzed, and reported company Conflict Minerals data in compliance with Section 1502 of the Dodd-Frank Act. Communicated daily with internal and external stakeholders at all levels of organizations on matters related to Social Compliance and Conflict Minerals. Received recognition for developing a process of identifying new vendors and factories from multiple sources of data, as well as managing social compliance and conflict minerals data associated with vendors and factories.
